protect

In 1979 we began our obsessive commitment to protect buildings and the people who use them and we haven't stopped since. To us, protection isn't only about providing durable products to protect your design, your buildings and your spaces. We also go to great lengths to provide an obsessive level of service all in the name of protecting your time, your budget and your reputation too.

That's protection from every perspective.™

THE IPC® ADVANTAGE

Plain and simple, IPC® Door and Wall Protection has been one of the most trusted solutions for commercial interiors over the past 40 years. Our family of products are durable, long lasting and easy to clean. Discover the IPC advantage and see how our solutions can work for you.

• **IPC®**
DOOR + WALL PROTECTION SYSTEMS

Unmatched Protection

Time and time again, we get asked to replace wall protection products from other vendors because they couldn't do the job they were meant to do – protect! While we believe in giving you choices in wall protection materials, we won't sacrifice durability ... so you can always count on our products to stand the test of time.

Endless Style Options

Who says Door and Wall Protection needs to look institutional? Our products come in a variety of design and style options to meet the needs of your facility. Corner Guards and Wall Guards are available in a variety of color and pattern options. As for Wall Covering, the sky's the limit!

In-House Expertise

Our foundation was built on Door and Wall Protection, so we know the industry inside and out. Our in-house experts are here to guide you through the selection process so you're sure to get the products you need while you focus on the other important pieces of your project.

Family of Products

With IPC, you can choose from an extensive line of Door and Wall Protection products to ensure your facility is covered from top to bottom. And because the same material options and finishes can be applied across many different products, you can create a cohesive look for your interiors.

Low Maintenance

Our Door and Wall products are so durable, you don't have to worry about endless maintenance or costly repairs. Our Palladium® Rigid Sheet has a velvet texture that makes it easy to clean – and our Ricochet™ Flexible Wall Protection is even graffiti-resistant!

Online Ordering

If you need a wall protection solution, you may purchase our most popular products through our website. Create an account to obtain quotes, place and view orders and process payments.

wall protection

Selection Guide

Ricochet™ Flexible Wall Protection

Ricochet™ combines the look of traditional wall covering with the durability of rigid sheet protection. Its flexible nature makes it easy to install and ideal for working along curved surfaces.

Aspex® Printed Wall Protection

Aspex® provides the high-impact durability of rigid sheet with the clear, crisp imagery of digital printing. With Aspex, you have the freedom to protect your walls with any image of your choosing.

Palladium® Rigid Sheet Wall Protection

Palladium® is our most popular product. Built for superior impact resistance, Palladium Rigid Sheet keeps your walls protected and looking pristine for years to come.

ricochet™

Flexible Wall Protection

Walls are one of the largest elements of your interiors. Give them a purpose and expand their longevity with Ricochet™, wall protection that literally bends to the whim of your design.

Ricochet combines the look of wallcovering with the durability of rigid sheet protection. With Ricochet's inviting textures, rich colors, alluring patterns and seamless appearance, your wall isn't just a surface, it's a canvas.

Durable

Like its name implies, Ricochet™ defends walls from the everyday challenges that are thrown their way. With a proprietary top coating and .040" thickness, Ricochet is built for abrasion resistance and superior impact.

Flexible

Available in 15yd rolls, Ricochet™ is applied like traditional wallcovering and achieves a seamless look. Different patterns incorporate distinctive textures that add subtle dimension to your walls.

Resilient

Public spaces are susceptible to staining and vandalism. But with Ricochet™, these threats don't stand a chance. Graffiti can be removed without damage to the surface using the strongest of standard liquid cleaners.

**Available in North America Only.*

aspex[®]

Printed Wall Protection

With Aspex[®] Printed Wall Protection, your walls become a canvas to enhance your brand, show personality and inspire the people who enter your building. Cover your canvas with logos and branding, or display beautiful artwork and vibrant imagery. However you use Aspex, your walls are sure to create a lasting impression, all while staying protected.

Your Walls Your Way

You select the image, we bring it to life. With Aspex[®] Printed Wall Protection, you have the ability to inspire your patrons with unique, custom designs - so your walls can make a powerful statement, all while staying protected.*

2X More Durable

We put our protection to the test! Aspex[®] Printed Wall Protection is 2x more durable than the competition.

Stands Up To Dirt And Grime

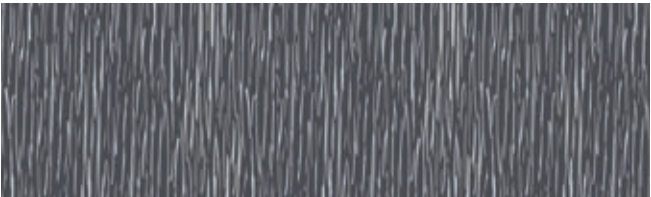

Not only is Aspex[®] Printed Wall Protection durable, but it also stands up to dirt and grime! Aspex achieved the highest rating of stain resistance and cleanability.

*You must have the legal right to use any image you would like to have printed. Inpro respects the intellectual property rights of others and reserves the right to request verification of any image submitted for print.

STANDARD ASPEX[®] PATTERNS

The beauty of Aspex[®] Printed Wall Protection is the ability to bring your custom imagery to life, but we understand the need for ready-to-print patterns that coordinate with the rest of your interiors. We've carefully selected several on-trend patterns to add a decorative element to your walls.

palladium®

Rigid Sheet Wall Protection

Palladium® Rigid Sheet is our most popular product and will keep your walls looking pristine for years to come. Built for superior impact resistance, Palladium keeps your walls safe from the damage that furniture, people and other moving objects leave behind.

Durable

Palladium® is extremely durable and cost effective. Offered in three different thicknesses, you can select the right fit for your walls and rest assured that they are safeguarded with superior impact resistance.

Material Options

While our Palladium® Rigid Vinyl is the most durable option, we understand that there is a need for a PVC-free solution. That's why we created G2 BioBlend®, a breakthrough in sustainability, made using a biopolymer blend of PETG and bio-based content.

Various Applications

Palladium® can be used in many different applications, including Wall Covering, Door Protection, Wall Panels and more. However you use it, your doors and walls will look like new for years to come!

MATERIAL OPTIONS

Rigid Vinyl:

Extremely durable and cost effective.

- ✓ No Phthalates
- ✓ No Halogenated Fire Retardants
- ✓ No BPA (bisphenol-a)
- ✓ GREENGUARD® Indoor Air Quality Children and Schools Certified
- ✓ May Qualify for LEED® and Green Globes Credit
- ✓ Recyclable
- ✓ Fungal & Bacterial Resistant (ASTM G21 & G22 Testing)
- ✓ Lowest Fossil Fuel Consumption of Polymers in manufacturing
- ✓ Superior Impact Resistance (ASTM D-256 Testing)
- ✓ Made in the USA
- ✓ Environmental Product Declarations (EPDs) available
- ✓ Health Product Declarations (HPDs) available
- ✓ Class A Fire Rated

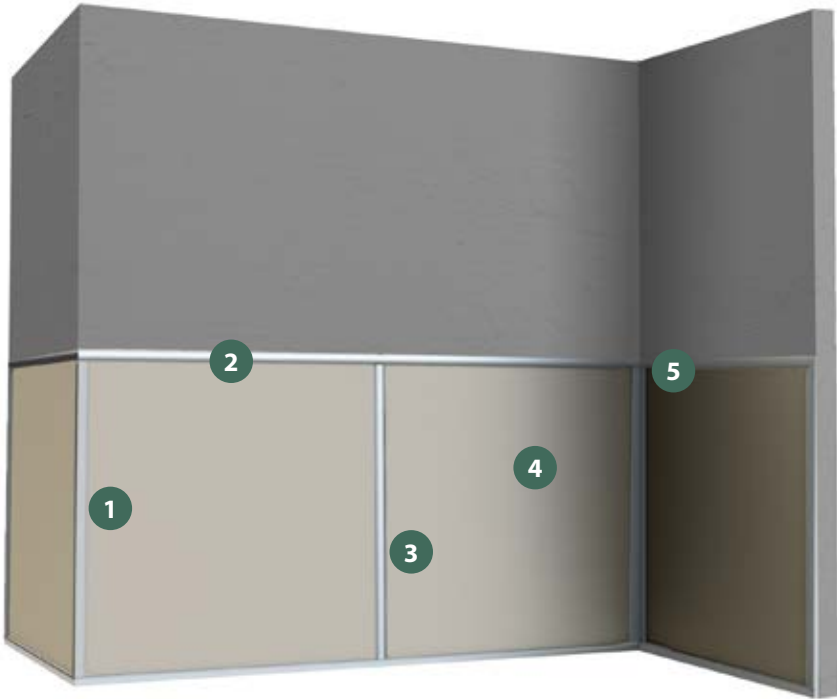

G2 BioBlend®:

A breakthrough in sustainability, made using a biopolymer blend of PETG and bio-based content, G2 BioBlend® answers the call for a superior PVC-free option.

- ✓ No Phthalates
- ✓ No Halogenated Fire Retardants
- ✓ No BPA (bisphenol-a)
- ✓ GREENGUARD® Indoor Air Quality Children and Schools Certified

wall panel

Systems

Our Wall Panel systems give you the durability of wall protection with the freedom to design layouts that incorporate different materials and finishes.

Whether you need Whiteboard Panels for team meetings in conference rooms or Printed Wall Panels with imagery that inspires, we have the solutions to make your rooms functional and beautiful.

Material Options

From fashionable to functional ... our Wall Panels are available in a variety of different options to meet your intended use. Choose from Palladium® or Ricochet™, and incorporate Aspek®, Whiteboard or Tackable Fabric when you use our Square Edge systems.

Balanced Construction

Our panels are constructed with a finished backing to prevent bowing and warping.

Class A Fire Rated

When used with Palladium® or Ricochet™, our Wall Panels are Class A Fire Rated* ... because we believe in not only protecting your buildings, but also the people who use them every day

SQUARE EDGE WALL PANELS

Our Square Edge Wall Panels give you durability with a flush look. The design allows for the panels to be cut and assembled in the field to ensure easy installation for difficult areas or challenging wall conditions.

Square Edge Panels, available in all of our colors and patterns, ship in two standard sizes:

- 46" × 94" (1.6M × 2.4M)
- 46" × 118" (1.6M × 3M)

Custom sizes available.

Square Edge Panels

Stainless Steel Wall Panels

Stainless Steel Wall Protection provides unmatched durability for the walls of your facility. We take the ease of installation to another level with pre-manufactured panels that are ready to go without on-site cutting required. This easy-to-clean material has food-grade allowance and overlapped installation to eliminate seams where dirt can hide.

- 18 gauge type 304 stainless steel #4 brushed finish standard
- 14, 16 and 20 gauge available
- Factory fabricated to size
- Maximum panel size: 4'x10' (1.2M x 3M)
- Type 430 available
- Formed edge for continuous transitions
- Available corner trim
- Screw-on or Adhesive mount with double sided tape and PL Premium Adhesive
- Diamond plate option without the formed edge also available (Adhesive mount only)

NuTree® Wall Panels

NuTree® Diamond Plate sheet offers heavy-duty protection for areas such as back-of-house operations and loading docks. Manufactured from Medium Density Polyethylene (MDPE), NuTree® sheets are easy to cut and mount to the wall with fasteners.

NuTree® Diamond Plate

NT-DP4896-BLK – 3/16" thick, 4' x 8'
NT-DP4896-GRY – 3/16" thick, 4' x 8'

doors

Doors and Frame Protection

Looking for durable architectural doors that withstand high amounts of traffic and abuse, all while maintaining an attractive décor? Look no further. Our doors tolerate high volumes of traffic in extremely abusive environments, yet they maintain their attractiveness, keeping your facility looking professional.

Total Protection

Our doors have the strength and durability of rigid wall protection, combined with the quality and performance of an Eggers Industries' wood flush door. The result: a durable, high quality door. Add Door Frame Guards and Edge Protectors for the total protection package.

Industry Expertise

Inpro is known as the expert in wall protection. Eggers is known as the expert in doors. Combine the two and the result is an exceptional product paired with remarkable customer service.

Construction Options

Our doors are built to handle a variety of situations from practical to the most extreme including:

- Non-Rated and Fire-Rated
- Acoustical
- Lead-lined
- Bullet-resistant
- LEED® Contributing

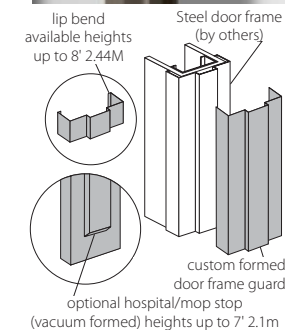

*All doors are exclusively available through Eggers Industries. For technical details and further information, contact Eggers at 920.793.1351 or visit eggersindustries.com today.

*Price information given is based on a range for product price only, with \$ representing the most economical choice and \$\$\$\$ representing the most premium choice when comparing products of equal materials, finishes and options. Other cost considerations like shipping, taxes, minimum order charges, etc. are not accounted for in this range.

**While these products are designed for behavioral health applications, they do not guarantee patient safety.

NOTE: G2 BioBlend® available in Solid Colors only.

Handrail Options

Bariatric Handrail

According to the Facility Guidelines Institute (FGI) 2010 Guidelines, facilities must now design for patients ranging in weight from 350lbs up to 1,000lbs. The Bariatric Handrail will support weights up to 1,000lbs when installed per manufacturer's guidelines. See our website or ask a sales representative for more information.

Antimicrobial Technology

SureContact® Handrails have an antimicrobial finish that inhibits the growth of mold and mildew. They have been proven to improve hygiene between cleaning and reduce the need for harsh bleach cleaning solutions. SureContact is available on the following handrails in any solid color: 800, 900, 2000, 1200, 3100 and 1000.

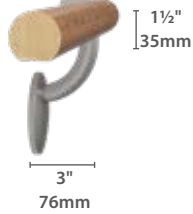

Ligature-Resistant** Handrails

Specifically designed to keep behavioral health patients out of harm's way, our Ligature-Resistant Continuous Mounting Bracket eliminates the gap between drywall and handrail by providing a wood fill along the entire length of the 800, 1000, 1100, 1200 and 3100 handrails.

900 M Handrail

Material Choices: Powder-coated Aluminum, Stainless Steel (Brackets, Returns, Corners)

THE CLICKEZE® ADVANTAGE

We all know the construction industry can be fast-paced. Whether you're an architect trying to specify the right product for the right space, an interior designer working on the aesthetics or a facility manager maintaining your building, you have a lot on your plate. It can be difficult to manage every detail, especially when working with a limited budget. That's where our commitment begins.

Not only do we have state-of-the-art production facilities to make window coverings, cubicle track and curtains to your specification, but our expert installation team and service staff have you covered so you never have to worry about the details of managing or maintaining your privacy systems. Let us take care of your next project.

• **CLICKEZE®**
PRIVACY SYSTEMS

Design

When it comes to fabric choices, the sky is the limit. Whether you select from a variety of our exclusive textiles or prefer to use your own, we will create product that complements the design of your building.

Measure

We have Territory Managers located throughout the country who can assist in the measuring process. Whether you need a little refresher or to learn from scratch, our team will be there to help you get the correct measurements for your project.

Fabricate

We have multiple production facilities located across the country with skilled sewing experts ready to make products to your specification. What does that mean for you? Great lead times and quality products made in the USA.

Install

In addition to manufacturing the products, Inpro Interiors®, our professional installation team, can install them. Our team will be there every step of the way to ensure your products are installed with the expertise they require.

Experts

Our team of product experts can help you find what you need and tailor it to your facility. From solar shades to cubicle track, Clickeze has you covered.

Variety

We stay up-to-date with the latest design and color trends to provide you with a variety of pattern choices for your soft goods. We work with all major textile manufacturers to acquire the pattern of fabric you want.

SHADES, BLINDS + COVERINGS

Solar Screen Fabrics

Maintain view while reducing glare and providing daytime privacy. Available in a variety of colors. Woven to specific standards to meet performance demand.

Blackout Fabrics

Block light providing daytime and nighttime privacy.* Optional side track system available. Available in a variety of colors. *When used with fascia, side tracks or sill channels, 100% light blockage is not guaranteed.

Traditional Cornice Board

Standard height: 12" (305mm) Fabric is wrapped around an extruded PVC system creating a smooth, lightweight board. Fire rated cord trim colors are included to perfectly accent your Cornice Board. Visit inprocorp.com to see our available cord colors.

Straight Cornice Board

Standard heights: 8" (203mm) or 12" (305mm) or 18" (457mm) Padded

Translucent Fabrics

Allow light into a space with no view out. Provides daytime and nighttime privacy. Available in a variety of colors (Amount of light flow varies by color).

High Performance Fabrics

Provide the highest energy performance while reducing glare. Available in a variety of colors.

Curved Cornice Board

Standard heights: 12" (305mm) or 18" (457mm) Padded

Angled Cornice Board

Standard heights: 12" (305mm) or 18" (457mm) Padded

Aluminum Blinds

1" Aluminum Blinds .006" and .008" slat options Width: Minimum 5.5"; Maximum 142" Height: Minimum 6"; Maximum 126" Available in a variety of colors.

Faux-Wood Blinds

2" Faux Wood Blinds 2" Premium Faux Wood Blinds Width: Minimum 7"; Maximum 96" Height: Minimum 10"; Maximum 120" Available in a variety of colors.

Arch Cornice Board

Standard heights: 12" (305mm) or 18" (457mm) Padded

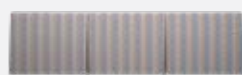

Pinch-Pleat Draperies

Pinch Pleat draperies offer a clean, classic look. Each pleat is composed of three evenly spaced folds. Drapes are attached to the carrier using a small pin.

Sheffield Valance

3 1/2" (89mm), 6" (152mm) and 8" (203mm) returns available 14" (355mm) high

Expanded Box Pleat Valance

3 1/2" (89mm), 6" (152mm) and 8" (203mm) returns available 14" (355mm) high

Ripplefold Draperies

Ripplefold draperies create a clean, uniform appearance from top to bottom. Panels are attached to the track using snap tape, creating smooth, evenly spaced curves in the fabric.

Grommet Top Panel Draperies

Round metal grommets used at the top of the panel create a uniform, modern look. The grommets are positioned so that the rod can slide through them with ease.

Pennant Valance

3 1/2" (89mm), 6" (152mm) and 8" (203mm) returns available 16" (406mm) high

Inverted Box Pleat Valance

3 1/2" (89mm), 6" (152mm) and 8" (203mm) returns available 14" (355mm) high

Back Tab Panel Draperies

Back Tab Panel draperies have fabric bands sewn onto the top back of the fabric panel. These tabs are hidden on the back and are used to hang the drapery by inserting the rod through them creating a folding appearance.

Sheers

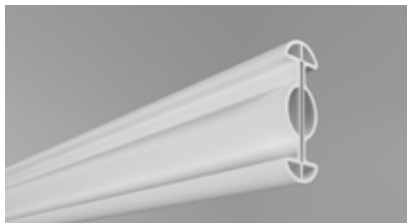

Drapery panels made of lightweight fabric, often used underneath an outer drapery or over a blackout shade. Width: 118" 100% Polyester

Dreamy Champagne Dreamy White Wishful White Wishful Marble

Custom Sheer Fabrics are available.

FORMATRAC® BENDABLE TRACK

We've eliminated the hassle associated with traditional track installation and design with our patented Formatrac® Bendable Track. It easily bends by hand on-site for simple installation and because of its flexible nature, can accommodate virtually any design. Independent testing has shown significant decibel reduction with Formatrac vs. standard aluminum track equating to over 50% noise reduction, making it the perfect solution for your healthcare space.

-  Standard track lengths allow for virtually any design or radius bend
-  Eliminates the need for splices, allowing your curtain to glide smoothly and quietly
-  End caps don't need to be removed to add or replace carriers
-  Over 50% decibel noise reduction compared to a standard aluminum track
-  Eliminates the need to order custom bends, decreasing lead time
-  Easily cut on-site by hand
-  Simple installation reduces install time by 40%
-  Accommodates most ceiling types
-  99% recycled aluminum core
-  Class A Fire Rating

Formatrac® Bendable Track
Case Study Looking for more information on our Formatrac Bendable Track? Visit the Formatrac page on inprocorp.com/clickeze to read a case study that discusses the acoustic benefits Formatrac can provide.

CE950496 - 9'6" (2.9m)
CE950410 - 10' (3.05m)
Extender available for five ceiling heights.
Post sold separately.

IV Carriage Optitrac™

Comes standard with Carriages over 8'
CE550208 - 8' (2.45m) ceiling/3" (76mm) drop (shown)
CE550286 - 8'6" (2.59m) ceiling/9" (229mm) drop
CE550209 - 9' (2.74m) ceiling/15" (381mm) drop
CE550296 - 9'6" (2.9m) ceiling/21" (533mm) drop
CE550210 - 10' (3.05m) ceiling/27" (686mm) drop
Drop includes combined length of carriage & extension.

IV Carriage Ultra Cube™

CE950208 - 8' (2.45m) ceiling/3" (76mm) drop (shown)
CE950286 - 8'6" (2.59m) ceiling/9" (229mm) drop
CE950209 - 9' (2.74m) ceiling/15" (381mm) drop
CE950296 - 9'6" (2.9m) ceiling/21" (533mm) drop
CE950210 - 10' (3.05m) ceiling/27" (686mm) drop
Drop includes combined length of carriage & extension

IV End Caps

CE9501(-AN)
Available for Ultra Cube® track only.
(-AN) - Available in white or gray anodized finish.

SAFETY LOADING UNIT

Our Safety Loading Unit provides a safer, easier solution for changing cubicle curtains because no ladders are required. The Safety Loading Unit can easily be retrofitted onto existing Clickeze Optitrac® or Ultra Cube® track or many of the track systems on the market. By lowering the cubicle track, you can reduce curtain change-out time by up to 25%.

Wall Mount
CE5920 - Optitrac® Safety Loading Unit - Wall Mount
CE8920 - Ultra Cube® Safety Loading Unit - Wall Mount
Custom sizes available.
Includes hinge, latch, wall mount bracket and 5' track (1.52m)

Post Mount
CE5921 - Optitrac® Safety Loading Unit - Post Mount
CE8921 - Ultra Cube® Safety Loading Unit - Post Mount
Custom sizes available.
Includes hinge, latch, post mount bracket and 5' track (1.52m)

Operating Wand
CE8521 - Operating Wand
Use one wand for every 10 units. 42" (1.06m) length

Solid Hook Spool Carrier
CE6030 - Solid Hook Spool Carrier (See Optitrac)
Peak load: 25.3 lb(f) (11.48kg(f))

Change Out Curtains Easily!

shield by panaz®

Fabrics

Liquid Repellent + Stain Resistant

Shield by Panaz® fabrics repel liquids and are highly resistant to most stains, making them an ideal fit for healthcare environments.

Design Options

Our Shield by Panaz® fabrics are offered in a variety of patterns and color ways. Perfect for cubicle curtains, shower curtains, window treatments and more, you'll be sure to find a fabric that coordinates with your building's design.

Antimicrobial Properties

Utilizing silane-based technology, Shield by Panaz® fabrics have been tested and proven to be permanently antimicrobial* to inhibit the growth of mold and mildew.
*When laundered per manufacturer's instructions.

Please visit our website to view full fabric offering.

STANDARD STOCK FABRICS

Clickeze® carries high inventory levels of some of our best-selling fabrics (shown below). Our in-house manufacturing capabilities enable us to get your curtains to you fast!

SHOWER CURTAINS

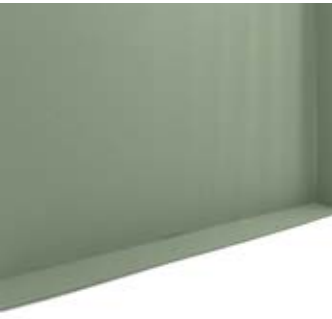

Privacy and cleanliness are of the utmost importance in shower areas. Our Shower Curtains are available for any need including ADA compliance. Our shower fabrics provide exceptional durability and sanitary protection. We also recommend using Shield by Panaz® fabrics for shower curtains. These fabrics contain antimicrobial* properties that inhibit the growth of mold and mildew reducing maintenance and making cleaning easier. Super Bio Stat™ is a high performance vinyl that's stain and odor resistant with antimicrobial* properties.

**When laundered per manufacturer's instructions.*

STANDARD

Standard shower curtains are custom-made to your specifications. Choose from the options below or from our Shield by Panaz® fabrics, available on our website.

ADA

ADA Shower Curtains create a temporary barrier along the shower floor and edges with outstanding water leak prevention that meets ADA requirements. Available in Super Bio Stat™ fabric.

SECURITY

Security Shower Curtains are ideal for behavioral health facilities, detention centers, massage schools or lab testing areas. Mesh on top for air/steam circulation, 38" (96.5cm) Super Bio Stat™ middle and 22" (55.9cm) translucent vinyl bottom. Custom sizes available.

THE ENDURANT® ADVANTAGE

At Endurant®, we design and manufacture our own products, so getting exactly what you need to protect your washrooms has never been easier. We fortify our washrooms with our BioPrism® Solid Surface material, which is non-porous and antimicrobial to inhibit the growth of mold and mildew. Clean, green, repairable and available in an array of colors, our custom BioPrism shower systems and partitions will protect your areas that need it the most.

• **ENDURANT®**
WASHROOM SYSTEMS

Product Experts

Our team of product experts will help you find what you need and tailor it to your project. They will be there every step of the way, making sure your products are chosen and installed with the expertise they require.

Custom Solutions

Our shower systems, wall panels and partitions are all customized to meet your needs. What does that mean for you? Instead of having to completely restructure your space, we have the ability to create custom products that will fit right into the preexisting structure.

Large Sheet Sizes

Larger-than-average sheet sizes make for less seams and less waste. This saves you time and money, and creates a smooth, continuous look.

Clean

Our proprietary BioPrism Solid Surface material stands up against the constant use of your facility, providing greater longevity than tile and grout. BioPrism is antimicrobial to inhibit the growth of mold and mildew, keeping your washroom cleaner than ever before.

Green

BioPrism Solid Surface is manufactured using a bio-resin blend containing rapidly renewable content. It is also GREENGUARD® Certified.

Repairable

BioPrism is a true solid surface, which allows for blemishes to be buffed out or washed away. Scratches, chips, cracks and other damage done to the material can be corrected, and the product is left looking brand new!

washrooms

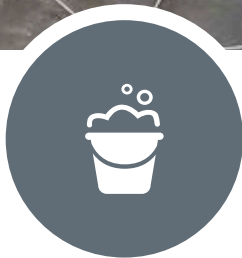

Fortify Your Washroom

At Endurant®, we offer almost everything you need to complete your washroom. From shower systems to partitions, we have it all. Our experts are always on hand to assist you through the ordering process and installation, so you're fully supported from beginning to end.

Shower Systems

With our extensive offering of shower receptors, walls, trim pieces, soap dishes, seats and grab bars, you'll be sure to find the products you need to complete your shower system.

Partitions

Partitions are constantly under siege from dirt and odor-causing bacteria and can require quite a bit of maintenance. Our Shower and Toilet Partitions are designed to combat these traditional problems associated with washrooms, keeping your space clean and looking like new.

Accessories

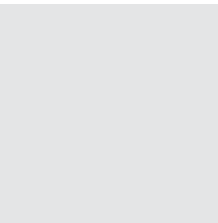

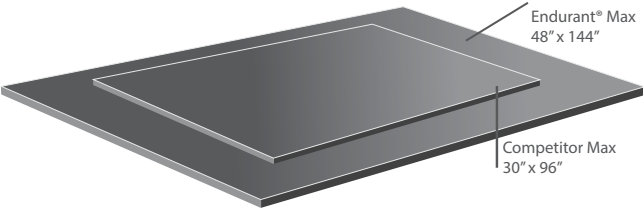

We obsessively develop products that will keep your facility looking newer longer—down to every detail. Our washroom accessories provide a functional, finishing touch to your washroom.

SHOWER WALLS + WALL CLADDING

Enhance your shower walls by adding patterns. The surface will still remain smooth, hygienic, grout free and easy to clean.

The following sizes are available in 1/4" thickness:
Width: 30", 36", 48", 60"*
Length: 84", 96", 120", 144"
*60" wide panels are only available in 84" and 96" lengths

The following sizes are available in 1/2" thickness:
Width: 30", 36"
Length: 96", 120", 144"

Smooth Panel

Standard
3" (76mm) x 6" (152mm)
Custom decorative panels available.

Beadboard

4" (101mm)
Custom decorative panels available.

Plankboard

6" (152mm) x 24" (609mm)
Custom decorative panels available.

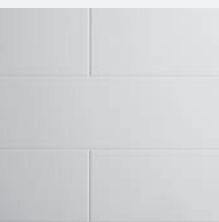

Subway

3" (76mm) x 6" (152mm)
Custom decorative panels available.

4", 8", 12" Square

(101mm)
Custom decorative panels available.

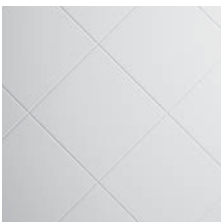

Horizontal

6" (152mm) x 24" (609mm)
Custom decorative panels available.

Stacked

10" (254mm) x 8" (203mm)
Custom decorative panels available.

Diamond

Custom decorative panels available.

Seaming Options

Soft Seam With Batten Strip

Silicone Sealant is used where panels meet. The Batten Strip is commonly used with this option to cover the soft seam.

Hard Seam With Wavy Edge

A hard seam is accomplished by using a color-matched composite adhesive that bonds with our BioPrism Solid Surface for an inconspicuous seam. This superior seam method prevents mold and mildew growth with its flush surface.

receptor

Selection Guide

Custom Receptors

Standard Receptors

Page Number	74	75
Material	BioPrism® Solid Surface	BioPrism® Solid Surface
Cost Index*	\$\$\$	\$\$
Sizes	Up to 60"W x 72"D (Maximum or ADA sizes may require central drain location)	Pre-Set
Variable Drain Location	✓	
ADA Compliant Designs Available	✓	✓
Shapes	Standard and Custom	Square, Rectangle, Neo-Angle Only

**Price information given is based on a range for product price only, with \$ representing the most economical choice and \$\$\$\$ representing the most premium choice when comparing products of equal materials, finishes and options. Other cost considerations like shipping, taxes, minimum order charges, etc. are not accounted for in this range.*

CUSTOM RECEPTORS

These shower receptors are custom made to your exact specifications. The size, threshold and drain location can be modified.

Neo-Angle Threshold

A great way to maximize corner space, the neo-angle option is nearly triangular in shape with two sides that form a 90° angle and a straight front entry.

Trench Receptor

The opening of this receptor is flush to the adjacent flooring to allow for easy wheelchair access. The trench spans the length of the receptor for maximum water management. The drain may be placed off-set to the right or left within the trench. Standard Widths: 36", 42", 48", 60" Standard Depths: 30" - 40"

No Threshold

The opening of this receptor is flush to the adjacent flooring to allow for easy wheelchair access. Pair it with our ADA Ramp for renovation projects!

ADA Threshold

The ADA Receptor features an ADA-compliant threshold.

No Threshold with Tile Shelf

This receptor is designed to receive floor tiles at the leading edge, creating an overlapping joint. This example also features a water barrier with a flange, providing a flat surface to accommodate the shower walls.

Curbed Threshold

Our curbed receptors are available in standard square and rectangular configurations. Sizes: 32"x 32" - 72" x 48"

Rectangular

30" x 32", 42" x 36"
Maximize your space with the efficient rectangular design of this receptor. It's great for multiple showers in a smaller space.

42 x 42 Neo-Angle with Wing Walls

A corner unit shower receptor designed to accommodate 2 partial 12" walls and appropriate plumbing.

36 x 36 Transfer

This receptor is one of the most common shower sizes and is perfect for large projects with consistent layouts.

42 x 42 Neo-Angle

A corner unit shower receptor designed to accommodate 2 partial 12" walls and appropriate plumbing.

Square

32" x 32", 36" x 36"
This receptor is one of the most common shower sizes and is perfect for large projects with consistent layouts.

NEW! Tub Replacement

Perfect for renovation projects that call for converting old bathtubs into clean, modern showers. Sizes: 60"W x 32"D right or left

Receptor Accessories

Trench Grate

A sturdy 12 gauge stainless steel grate, spanning the width of the receptor. Includes brass drain assembly with gasket to accommodate 2" Schedule DWV 40 pipe.

ADA Ramp (Add on)

DSADARAMP120072
Easily add a BioPrism® Solid Surface ramp to your shower base for a handicap-accessible transition that accommodates specific floor conditions. The non-slip, textured surface helps prevent slips and falls. Available in shower receptor colors below. 12"Wx72"L.

Standard Drain

Included
Features a brass construction, fiber and rubber gaskets for a tight seal, and a 4 ¼" polished snap on stainless steel strainer. Fits 2" Schedule 40 DWV pipe.

Tamper-Resistant Drain

A PVC, tamper-resistant option secured with screws. Features a stainless steel strainer and fiber and rubber gaskets for a tight seal.

THE SIGNSCAPE® ADVANTAGE

At Signscape®, we manufacture and install signs to provide you with the solutions you need. And unlike any other sign company, we can perfectly match signs with our IPC® Door + Wall Protection and Ascend® Elevator Protection Systems to create a complete look throughout your building. We take care of everything from design to installation so you can guide the people within your buildings with ease.

• **SIGNSCAPE®**
ARCHITECTURAL SIGNAGE

Experienced Experts

Our team of product experts will help you find what you need and tailor it to your facility. From room identification signs, to directories, to ADA compliant signs, SignScape will make your signage experience easy.

Perfect Coordination

We can match your signs to your IPC® Wall Protection and Ascend® Elevator Protection products to create a cohesive look throughout your building.

Professional Installation

In addition to creating your signs, we'll also install them. Inpro Interiors®, our professional installation team, will be there every step of the way to ensure your products are installed with the expertise they require. Please contact your SignScape sales representative for details on availability in your area.

Configurable Online

Our new configurator makes your sign selection experience easier than ever. Visit our website to virtually create your signs with a click of a button.

Countless Options

Choose from a variety of materials to find the perfect signs for your facility. Whether you're looking for signs to coordinate perfectly with your facility, signs that stand up to vandalism, or signs made with natural materials, we have the solution for you.

ADA Compliance

The 2010 ADA Guidelines have specific parameters for signage products. If your signs do not meet ADA standards, you are at serious risk for facing large fines—up to \$75,000 for one signage violation and up to \$150,000 for subsequent violations. By providing numerous ADA compliant products and our installation knowledge, we can help you avoid hefty fines while accommodating everyone who uses your facility.

SIGN COLLECTIONS

Designed to take the headache out of sign selection, our Sign Collections feature popular shapes and designs, and are available in a variety of materials and colors.

Contego™

In life, change is constant. Especially in buildings. Until now, there hasn't been a modular sign system that can handle these changes.

That's why we developed the Contego™ Modular Sign System. Contego is the first configurable sign system designed with patent-pending Quick Pins™, so changing your signage is so quick and easy. Contego can be secured to the wall with double-sided tape or screws for added protection against vandalism.

NEW! LokTab™

Identifying patient information quickly, clearly and securely is crucial in a fast pace, healthcare setting. Use LokTab™ to visually communicate critical patient information to medical staff, allowing them to quickly identify individual patient needs. The locking tab system prevents confusion by keeping information clear and secure.

*Pair with various collections.

SIGN MATERIALS

Standard Materials

Rigid Vinyl: Our Rigid Vinyl signs are made from the same material as our Door + Wall Protection, providing durability and a perfect match between signs and door + wall products. The text, braille, pictograms and decorative accents are each individually applied to create the sign.

Photopolymer: Our photopolymer signs are made from a UV sensitive material that, when exposed to UV light, creates a one piece sign with integral text, braille, pictograms and decorative accents.

Chemetal®

Chemetal is made from durable anodized aluminum and can be used as a back-plate on any of our sign collections. It is a metallic laminate that is adhered to our PETG substrate, then topped with your choice of face-plate. This material looks best with a photopolymer face-plate. Chemetal® is a registered trademark of Advanced Resin Products, Inc.

3Form®

Our clear Photopolymer is bonded to 3Form to create imaginative sign solutions. The material is encapsulated between the clear photopolymer layers for a creative sign solution. 3Form is made from a minimum of 40% pre-consumer recycled resin and can be used as a face-plate or back-plate. Minimums apply for 3Form/Designer patterns; inquire for details. The 3form trademark is property of 3Form, LLC.

SPECIALTY SIGNS

Rigid Vinyl Dimensional Characters

S600: .060" thick letters
S600-6MM: .060" thick letters mounted on 6mm celtec backer
Heights: 2" (51mm), 4" (102mm), 6" (152mm), 8" (204mm), 10" (254mm), 12" (304mm), 14" (355mm), 16" (406mm)
Custom sizes also available.
Interior use only.

Formed Plastic Dimensional Characters

Available in multiple sizes, colors and finishes. Contact your sales representative for more information.
For interior or exterior use.

Aluminum Flat Cut Dimensional Characters

Available in multiple sizes, colors and finishes. Contact your sales representative for more information.
For interior or exterior use.

Activity Calendar

Keep patrons and staff on schedule with Activity Calendars.
S450 Activity Calendar Sign Size: 47.875"h x 68.5" w (with Clear Windows, Window Size: 5.5"h x 8.5"w);
S455 Activity Calendar Sign Size: 28.5"h x 44" w (with Clear Windows, Window Size: 3"h x 5"w)

Menu Signs

Make sure your patrons never miss a meal with a daily or weekly Menu Board.

Framed Whiteboards

Choose from magnetic or non-magnetic boards.

THE ASCEND® ADVANTAGE

The elevator cabs in your facility are the most likely to show signs of wear and tear. Since every guest who enters your building takes an elevator at some point, shouldn't the interior meet the same exceptional standards as the rest of your building? We think so. That's why our commitment to protection has carried over into elevator cabs. See how Ascend® can take your elevator interiors to the next level.

Quick Installation

Our cabs feature a patented fastening system allowing for a quick and simple installation, which saves you elevator down time! Screws and seams are covered with a reveal strip that prevents tampering while enhancing the overall design.

1. Interlocking clip system installs from the bottom up.
2. Fasten the panel and reveal trim for perfect spacing.
3. Completing installation is as easy as securing the frieze to the last panel.

 For complete installation instructions and to view our tutorials, visit www.inprocorp.com/ascend.

Maximum Durability

Our elevator panels are constructed with a finished backing to prevent bowing and warping.

No More Chipped Edges

Our Full Wrap Panels feature Edge Protectant Technology™ with fully wrapped and bonded edges. What does that mean? It means the days of material chipping at the edges are over!

Class A Fire Rating

Our panels are Class A Fire Rated because we believe in not only protecting your buildings, but also the people who use them everyday.*

*G2 BioBlend Material has a Class B Fire Rating.

Design Flexibility

Select the right cab for your facility from our many different options. From panel color to handrail size, you can mix and match to create a cab interior that will leave a lasting impression.

Multiple Material Options

Depending on potential weight limits or budget constraints, we have a variety of materials that will help you meet restrictions.

Configurable Online

Now, creating your elevator cab has never been easier. With Ascend®, you can customize the look of your cab with our free Online Configurator. Visit inprocorp.com/ascend to get started.

THE JOINTMASTER® ADVANTAGE

At JointMaster® our products allow for the natural shifting and movement of buildings with our seamless Expansion Joint Systems engineered to handle unique conditions. We realize every building has different needs, so we have a team of experts on hand to help with your project-specific conditions.

• **JOINTMASTER®**
EXPANSION JOINT SYSTEMS

Obsessively Engineered

We constantly test and review our systems to create designs engineered to meet your needs. Whether it's applying tapered plates for maximum durability and longevity, noise dampening elements to reduce noise pollution, or using recycled tires as an eco-friendly option, we continuously innovate to provide you with the best solutions.

Designed to Protect

From ensuring smooth transitions for equipment carts and wheelchairs, to protecting your parking facility from the elements, you can count on us to provide the protection your buildings require.

Experienced Experts

When you create the design for your building you create something unique, so why entrust just anyone to make your design come to life? Our JointMaster experts obsess about your building and the people who use it and go to extreme lengths to fortify buildings in their stand against the elements. Unique building conditions, custom applications or installation training, our 'joint-masters' will help your team win big on your next project.

Put to the Test

We put our products to the test to ensure they can withstand the wear and tear of everyday use and can even perform in a catastrophe. At JointMaster we don't just build products to function, we build products to last and we put them to the test to prove it.

Manufactured with Care

At JointMaster we are committed to making the best products for our customers. With our onsite manufacturing capabilities we can ensure that only the best products are shipped out to your project. We manage our products under the accordance of ISO 9001:2008 which includes the design and distribution of proprietary interior and exterior architectural products.

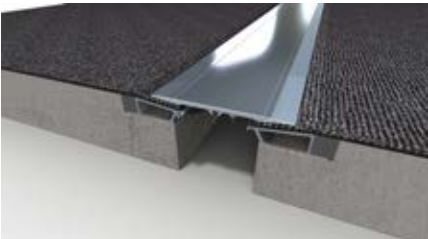

Here to Serve

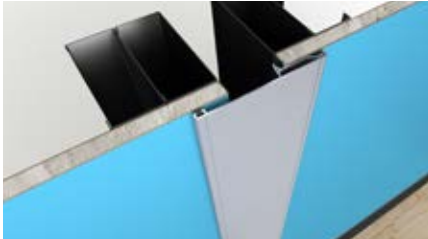

While our expansion joint products are here to serve your building, our team of seasoned experts is here to serve you and your team throughout the entire project. At JointMaster, we don't just walk away once the last joint cover is installed – we're here to support you, your building and the function of our product for years to come. It's important to us that your systems continue to work as well as the day they were installed.

Category Features	<div>Various Loading Capabilities: From Standard to Heavy Duty loading capabilities, JointMaster® has designed expansion joint systems for unique buildings.</div>	<div>Minimal Sightlines: Whether you infill the system with your wall finish or select a coordinating Santoprene® seal, JointMaster® wall expansion joints are designed to blend into your building and fortify your design.</div>	<div>Nature Resistant: Nature plays a big role in the wear and tear of your building. Our exterior expansion joint systems were specially constructed with materials to combat the daily abuse your building undergoes.</div>	<div>Designed For Installation: Instead of making you fight an uphill battle, we engineer our systems with installation in mind. Simplified installation means effective products, saved time/money and happy building owners.</div>	<div>Sophisticated Solutions: From fire rated foam to the industry's only patented waterproof design, you can rest assured that our JointMaster experts will help you find the right system to protect your building and the people inside.</div>	<div>Designed to Defend: Open air structures face unique obstacles such as UV damage, rain, snow ... snow PLOWS, natural movement, traffic and more. Why use products that aren't designed specifically with these challenges in mind?</div>
	<div>Design Flexibility: We've engineered systems that not only perform, but look good doing it.</div>	<div>Santoprene® Security: Many of our systems include our Santoprene® Seals which are GREENGUARD® Gold Certified meaning they are safe for use in education and healthcare environments.</div>	<div>Built to Last: Not only should your expansion joints perform, but they should look good too. Exterior expansion joint systems play an important role in the structural makeup of your building, and also make an impression on visitors.</div>	<div>Extreme Resistance: Heat, water, UV rays, pedestrian traffic and more are all threats to your building. Our products are made from materials that can tolerate even the harshest of environments.</div>	<div>Obsessed With Safety: From UL 2079 rating tests to 'Hose Stream' testing, we rigorously push our products to the limit so you can feel confident in their performance.</div>	<div>Unlimited Applications: From parking garage to skydeck patio, our open air products are engineered to protect all environments with the design flexibility to meet your standards.</div>
	<div>Smooth Transitions: Gone are the days of tripping over a cover plate or hearing that all too familiar 'clunk' of wheels on an expansion joint. Our expansion joints are designed to blend in as passive protection systems.</div>	<div>Adaptable Design: Unique building conditions? Pairing with a floor and ceiling system? We've got you covered. Our JointMaster® systems work together to complete your project and fortify your building against the elements.</div>	<div>Configurable Installation: Whether you have unique site conditions or intricate installation needs, our systems are designed to make your installation go smoothly. Contact a JointMaster® expert for assistance specific to your project.</div>	<div>Made For You: Whether you need factory made transitions to address unique field conditions or a custom colored seal to match your design, we have the expertise to offer you the solution you're looking for.</div>	<div>Multiple Configurations: We understand that every building faces unique conditions so we've developed systems that meet your needs rather than relying on field modifications or design changes.</div>	<div>Complete Protection: From heavy duty cover plate options to industrial strength rubber wall guards, water tight compression seals to speed guards that enhance pedestrian safety, JointMaster® has products to defend your space from top to bottom, inside and out.</div>
